Action of the Richmond Banks. The Clearing-House Association of Richmond at a meeting hold yesterday evening resolved to adopt the certified-check system which is in use in many other cities and which was so successfully employed here during the business depression of

This system, in brief, makes certified checks do much of the duty of currency. Our banks-solid, conservatively con ducted, and safe in the confidence of the people as they are—would have no need at all to resort to this expedient if the banks orth of us would remit here in currency what is due. This, however, they will not do. What they owe Richmond they say in drafts, and hence the action of yesterday-which was only taken after n very deliberate canvass of the situation be the best financiers that we have here, The details of the plan adopted will be found fully and accurately explained in car local columns. It is in the main simiar to that adopted at New Orleans on and after to-day will be at liberty to check t out in currency; but on deposits previcusly made it is proposed to limit payments in currency (save in exceptional

In our judgment this was the best thing that could have been done. It was action taken in the public interest, and, as such hould be heartily endorsed and approved by the community. We shall find the sys-tem a good one. It is based upon ample credit and stood the exacting test of the exetting panie of 1973. It is, however, but a temporary expedient. Our leaders at Vashington are gradually getting nearer together on the great questions at issue and with the legislation expected the currency famine will soon be over and money andant. The popular pressure upon Congress for early action insures prompt

If this resolution us it stands shall be supported by the friends of free coinage, the opponents of free coinage will hardly raise any objections to it. If it becomes a law its passage will be the greatest possible tribute to Mr. CLEVELAND's ability and statesmanship.

It will not be inconsistent in them for

the friends of the free comage of silver to vote for the caucus resolution. If they believe, as they profess to believe, that par with gold bullion, then all that the need demand is free coinage. The ratio will take care of itself.

It may be objected that a silver dollar containing a gold dollar's worth of silver bullion would have entirely too much weight and bulk. This objection would not apply to subsidiary silver coins. Quarters and haives would not be too heavy or too bulky, and the ten-cent piece would be improved. Silver certificates would be used to represent the silver dollars.

We made the point several days ago that

Mr. BECKWITH, appointed a United States senator by the Governor of Wyoming after the Legislature had had an opportu-nity to elect one but had neglected or failed to de sc, had no membership to resign, his right to a seat being contested before the Senate itself, which has the sole power to pass upon the elections, cations, and returns of the members of that body. Yesterday the telegraph brought the news that the Governor of Wyoming had decided not to appoint a United States senator in place of BREAWITH until after the Senate had de-cided whether or not he had a right to resign. The question is a highly interesting one, and fifty years ago would have been decided against

the right of the Governor to appoint a senator under such circumstances as those under which Mr. Brokwith was appoint-

likely to decide the question in favor of the doctrine that a State is entitled to be represented in the Senate at all times, exeptions to be made, if at all, only in such cases as the Senate itself shall, when they arise, hold to be exceptional. For our part we hold now to BEN Hill's dictum that when the Constitution of the United States provides for filling such vacancies in the United States Senate as may " happen" during the recess of the State Legislature that instrument ought to be construed to mean all vacancies that " happen to exist"-not merely unexpected va-

A Compromise.

The compromise resolution which was adopted in caucus by the silverites of the House of Representatives on Wednesday last leaves, it would seem, nothing to be done but to frame and pass a bill containing the features of the said resolution. The silverites surrender the question of the ratio of comage. The anti-silverites surrender the question of coinage. The former believe that the free coinage of silver will bring it to a parity with gold. So they cannot object to the ratio, let it be what it will. Free coinage is what is to solve the silver problem, they have always maintained. On the other hand, the anti-silverites know that to put a sufficient quantity of silver in the silver dollar will be to bring it to a parity with gold. If you believe in your theories, gentlemen, stand up to them.

The United States of the World. Hon, JOHN W. DANIEL in his Chicago address eloquently predicted that the United States of the World would at some day in the ruture assemble their representatives in session. We have long beheved, or rather hoped, that there was to be a universal currency, a universal government, and a parliament of man or federation of the world. So we will avail ourselves of the occasion to remind all persons of all parties that Hawaii is to beme a part of the United States or else our country will appear to great disadvantage in the eyes of the world. There is nothing for UNCLE SAM to do except to speak the needed word. No nation on the face of the globe will dare to say "Nav." The time for dilly-dallying over this matter has passed. Let us act.
